SUMMARY OF QUALIFICATIONS

Computer Science Ph.D. student with a strong background in robotics, machine learning, and simulation for surgical applications. Experienced in developing real-time systems that integrate medical imaging and sensorized instrumentation to improve surgical performance. Additional experience developing virtual reality (VR) and augmented reality (AR) systems for surgical navigation, training, and data generation.

EDUCATION

- | | |
|--|-----------------------|
| Johns Hopkins University, Baltimore, MD
Ph.D. student in Computer Science, advised by Dr. Peter Kazanzides
• Expected graduation: February 2027 | Aug. 2021 – Present |
| Purdue University, West Lafayette, IN
M.Sc.Eng. in Industrial Engineering, advised by Dr. Juan P. Wachs | Aug. 2019 – July 2021 |
| Universidad Nacional de Colombia, Bogotá, Colombia
B.S. in Electronic Engineering | Aug. 2013 – Dec. 2018 |

PROFESSIONAL EXPERIENCE

- | | |
|---|---|
| Laboratory for Computational Sensing and Robotics (LCSR)
Computer Science Ph.D. program, Johns Hopkins University
• Developed 3D reconstruction algorithms for surgical scenes based on structure-from-motion, stereo depth, and robot kinematics for augmented reality (AR) navigation. Work under review at Healthcare Technology Letters 2026.
• Developed vision-based tracking algorithms to correct misalignment of AR overlays of critical structures caused by camera motion or deformation of the surgical bed.
• Designed registration strategies between vision-based 3D models and cone-beam CT and ultrasound images.
• Implemented navigation systems for skull base surgery based on an online digital twin of the patient running in a C++ physics simulator.
• Developed a virtual reality (VR) interface for digital twin navigation and evaluated the system on mastoidectomy training tasks.
• Conducted user studies comparing visual, auditory, and haptic feedback, derived from signed distance fields to critical structures during mastoidectomy, to improve situational awareness. Published at IROS 2023; submitted to IEEE Robotics and Automation Letters 2026. | Aug. 2021 – Present
Baltimore, MD |
| Institute of Image-Guided Surgery of Strasbourg
Research Fellowship with Dr. Nicolas Padoy
• Led a research project in collaboration with clinicians from Gemelli Hospital (Rome, Italy), developing AI systems that improve intraoperative assessment of cancer spread during diagnostic laparoscopy.
• Developed an AI-based registration strategy to correlate preoperative CT imaging with intraoperative laparoscopic video during cancer spread assessment.
• Fine-tuned Vision Transformer backbones using self-supervised learning on a dataset of diagnostic laparoscopy videos.
• Developed models for the downstream task of abdominal region identification to correlate video and CT on a region-by-region basis. | Jan. 2025 – Nov. 2025
Strasbourg, France |
| Robotics & Digital Solutions at Johnson & Johnson, Algorithms/AI team
Machine Learning Summer Internship with Dr. Hedyeh Rafii-Tari
• Conceived and implemented machine learning skill analysis algorithms using kinematic data from a teleoperated robotic bronchoscopy system.
• Built a skill analysis annotation pipeline for clinical data. | May 2022 – Aug. 2022
Redwood City, CA |

FUNDING AND FELLOWSHIPS

- | | |
|--|-----------|
| Chateaubriand Fellowship: \$17,500
<i>Next generation of surgical simulation environments for training and synthetic data generation</i> | June 2024 |
|--|-----------|

AWARDS AND HONORS

RSJ/KROS Distinguished Interdisciplinary Research Award 30th IEEE International Conference on Robot & Human Interactive Communication	Aug. 2021
Best Presentation Award Raven/dVRK research workshop at the Hamlyn Symposium 2021	July 2021
Exemption from undergraduate tuition, Universidad Nacional de Colombia Awarded to the 15 students with the highest GPAs in the Electronic Engineering Department	2014 – 2017

TECHNICAL SKILLS

General: Surgical robotics, Computer vision, Vision foundation models, AR/VR/XR
Programming languages: Python, C, C++
3D modelling software: Blender
Operating systems: MacOS, Linux and Windows
Python Libraries: Pandas, NumPy, and Pytorch
Robotics: ROS1, ROS2

TEACHING EXPERIENCE

Computer Science Department, Johns Hopkins University Summer course instructor	Summers of 2023 and 2024 Baltimore, MD
• Taught an 8-week undergraduate-level course on the fundamentals of programming in C and C++.	

LANGUAGES

- Spanish: native speaker
- French: proficient speaker, level B2 (DELF certification, 80.5/100)
- English: proficient speaker (TOEFL certification, 108/120)
